

Going beyond the leaf surface with contact plus

syngenta®

MEDALLION Turf Fungicide offers contact plus – exceptional spore busting capabilities on the leaf, in the thatch, and on the soil surface.

What MEDALLION offers you:

- A reach that is greater than standard contacts through activity on and in the leaf
- Good residual disease control at low product use rates
- High quality suspension concentrate formulation with incredibly fine milling that optimises coverage and distribution – in the tank and on the turf
- Rainfastness to ensure the protection stays in place once applied
- Activity on hard to control diseases like Anthracnose in the thatch and on the soil surface
- Strong resistance management abilities when used in rotation with multi-site products like DACONIL WEATHER STIK Turf Fungicide

TM

SpraySURE | Accuracy and Performance

To achieve great results, accurate application is important.

Target	Syngenta Nozzle	Optimal Water Rate	Optimal Pressure Range
Leaf and crown F	XC 04 or XC 025	300 to 500 L/ha	2 to 4 bar

MEDALLION attacks germinating spores and developing fungal mycelium to rapidly clean and protect external surfaces. The longer reach of Medallion into the leaf tissue allows the 'early curative' window to be wider than is possible for other contact fungicides.

Example: When cool and wet weather start to combine through late autumn into winter, the window for Winter Fusarium infection begins to open. Under these circumstances consider applying MEDALLION at 3 L/ha as a proactive measure to prevent infection from occurring. If minor evidence of activity is noted, immediately apply MEDALLION as an early curative treatment. For further developed infections consider INSTRATA or BANNER MAXX Turf Fungicide.

Target Diseases	Rate	SpraySure
Anthracnose, Brown Patch, Dollar Spot, Helminthosporium Disease, Winter Fusarium/Microdochium Patch	3 L/ha	F

Refer to the registered label for full details and instructions for use. **F** = Foliar applied **So** = Soil applied **Su** = Surfactant required

Active Ingredient

MEDALLION contains 125 g/L fludioxonil, a member of the phenylpyrrole fungicides

GROUP **12** FUNGICIDE

Formulation and Packaging

5 L pack size

High quality suspension concentrate (SC) with very fine milling, minimal odour and excellent suspensibility in spray mixtures.
