

RESERVE 2

PERENNIAL RYEGRASS

Lolium perenne

DESCRIPTION

Reserve 2 is a new and improved NZ winter active Turf-Type Perennial Ryegrass. In independent trials it has shown significantly higher winter activity than Rely. It was selected for turf quality, and winter recovery. It is best suited for use on heavy-use sports fields, golf course tees, and for lawns that demand turf quality as well as exceptional wear recovery over the winter months. Reserve 2 has a mid-dark green colour and fine leaf texture. Reserve 2 is an excellent option for overseeding both cool and warm season grasses. Reserve 2 is adapted to the cool-season zone and transition zones 1, 2, 3, 4, 5 and 6.

APPLICATION

- Golf course fairways, tees, and roughs, sports turf, lawn and landscaping

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones, warm-season zones for winter overseeding of Couch grass turf. Zones 1,2, 3, 4, 5 and 6

PRODUCTION AREAS

Canterbury, NZ

SEEDS PER Kg (APPROXIMATE)

~125,000

FEATURES & BENEFITS

- Improved winter activity
- Ideal in areas with fast establishment and wear tolerance issues
- Excellent wear tolerance
- Excellent year-round turf density and quality

RATE*

- Overseeding (warm season): 3-3.5 Kg/100m².
- Overseeding (cool season): 3-3.5 Kg/100m².
- New Seeding (cool season): 4 – 5 Kg./100m².
