

SLUGGER 3GL

PERENNIAL RYEGRASS

Lolium perenne

DESCRIPTION

Slugger 3GL is a new and improved Turf-Type Perennial Ryegrass, and was the top performing variety in the recently completed NTEP trials in 2021. It was selected for turf quality, wear tolerance and gray leafspot resistance. It is best suited for use on heavy-use sports fields, golf course tees, and for lawns that demand turf quality as well as disease resistance and exceptional wear tolerance. Slugger has a very dark green colour and fine leaf texture. Its ability to tolerate a low height of cut, makes Slugger an excellent option for overseeding both cool and warm season grasses. Slugger is adapted to the cool-season zone and transition zones 1, 2, 3, 4, 5 and 6.

APPLICATION

- Golf course fairways, tees, and roughs, sports turf, lawn and landscaping

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones, warm-season zones for winter overseeding of Couch grass turf. Zones 1,2, 3, 4, 5 and 6

PRODUCTION AREAS

Oregon, upper Midwest

SEEDS PER Kg (APPROXIMATE)

~125,000

FEATURES & BENEFITS

- Improved seedling gray leaf spot performance
- Ideal in areas with fast establishment and wear tolerance issues
- Excellent wear tolerance
- Excellent year-round turf density and quality
- Improved disease resistance

RATE*

- Overseeding (warm season): 3-3.5 Kg/100m².
- Overseeding (cool season): 3-3.5 Kg/100m².
- New Seeding (cool season): 4 – 5 Kg./100m².
