

INTENSE PERENNIAL RYEGRASS

Lolium perenne

DESCRIPTION

Intense is a new and improved Turf-Type Perennial Ryegrass selected for turf quality and gray leafspot tolerance. It is best suited for use on heavy-use sports fields, golf courses, and for lawns that demand turf quality as well as disease and traffic performance. The color and texture of Intense blend well with other cool-season grasses. Its ability to tolerate a low height of cut makes Intense an excellent companion in seed mixtures used for establishing professional turf as well as overseeding both cool and warm season grasses. Intense is adapted to the cool-season zone and transition zone as well as irrigated arid regions.

APPLICATION

- Golf course fairways, tees, and roughs, sports turf, lawn and landscaping
- Use in Ryegrass blends and mixtures with other cool-season species including low-cut Kentucky Bluegrass

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones, arid regions with irrigation, warm-season zones for winter overseeding of Bermudagrass turf

PRODUCTION AREAS

Oregon, upper Midwest

SEEDS PER POUND (APPROXIMATE)

~250,000

FEATURES & BENEFITS

- Improved seedling gray leaf spot performance
- Ideal in areas with fast establishment and wear tolerance issues
- Very good traffic tolerance
- Excellent year-round turf density and quality
- Improved disease resistance

RATE*

- Overseeding (warm season):
15+ lbs./1,000 ft².
- Overseeding (cool season):
5 – 7 lbs./1,000 ft².
- New Seeding (cool season):
8 – 10 lbs./1,000 ft².

*Local conditions vary and dictate rates
